HPMC Hard Capsules

EMBO 
CAPS[®] VG^α
(ALPHA)

EMBO CAPS[®] VG^α_(ALPHA)

The Crystal Clear Alternative

EMBO CAPS[®] VG ALPHA is a vegetable capsule which has been manufactured from Hypromellose(HPMC) without any gelling agents through a thermal gelation process.

EMBO CAPS[®] VG ALPHA is greater in strength and glossy in appearance.

As it does not contain materials which may hinder dissolution, it is easily dissolved in various liquids and it shows equal performance in encapsulation with conventional gelatin capsules. As a non-animal based alternative, EMBO CAPS[®] VG ALPHA is suitable for products catering to a variety of consumer lifestyles and religious preferences.

EMBO CAPS[®] VG ALPHA is manufactured with low moisture property making it suitable for hygroscopic dosages. Glossy and smooth surface of EMBO CAPS[®] VG ALPHA makes it easier for users to swallow.

Advantages

- Manufactured from HPMC without gelling agent.
- Easily dissolved in various liquids.
- Suitable for hygroscopic dosages.
- Low brittleness in low moisture settings.
- Greater capsule strength with higher visual clarity.
- Non-GMO, preservative-free, gluten-free, and allergen-free
